----------------------------	----------------------	---

core competencies

- > Structural design
- > Restoration, renovation + historic preservation
- > Code analysis, feasibility studies, investigations + condition assessments
- > Wind, seismic, vibration, blast + progressive collapse design
- > Parking consulting + planning
- > Residential inspections
- > Completed USACE PDC Blast Design Training
- > Disaster response
- > Specialty materials engineering | mass timber + tilt-up concrete
- > Maintenance programs
- > Temporary mobile roofs, scaffold, aluminum truss + outdoor event structures

differentiators

We are open-minded in our approach + thinking — thought leaders with diverse experience. Our clients partner with us for our collaborative structural engineering services: planning, design, inspection, investigation.

- > 15+ years into full implementation of BIM
- > National reach in 10 markets
- > Engineering specialties across construction materials + vertical building types

We believe in collaborative teams — partnership with owners, architects, developers + construction team members. With a creative approach supported by an understanding of market trends, we can design adaptive structures that meet owners' needs.
